

# The Windsor Lo-Profile

The Windsor Lo-Profile (LP) series cabinets feature a blow molded cabinet and two injection molded covers designed to leave the valve exposed for easy adjustment and viewing. The cabinet design also allows the valve to be oriented to fit the installation... to the front, to the back, left or right. Available in three models, the cabinets are sized to fit 18", 24" and 35" tall mineral tanks without base.

Their unique design makes the Windsor LP series easy to assemble, reducing labor costs. The cabinet body features a molded push-up that holds the bottom of the mineral tank in place without the need for a retaining plate. The top of the cabinet allows the neck of the mineral tank to snap into place, securing it for shipment.

The large salt port opening allows easy filling of rock or block salt. The injection molded salt port lid is easy to handle and locks securely in place.

Cabinets are available in almond or white with brown or black covers. An optional injection molded grid is available. Please call our Sales Department for further information.

**Part #:**      **Description:**

- G2723              Windsor LP-35 Almond/Brown Cover
- G2723-03        Windsor LP-35 Almond/Black Cover
- G2723-02        Windsor LP-35 White/Brown Cover
- G2723-04        Windsor LP-35 White/Black Cover

The Windsor LP-35 cabinet accepts 35" tall mineral tanks less base.
