Water Conditioning Systems

Features & Benefits

Microprocessor Controlled Demand Regeneration

- Solid State Microprocessor with easy access to front panel settings
- Stores settings in non-volatile memory
- Coin Cell Lithium battery back-up with an 8 hour carry over of time for power outages.
- Accurately recharges only when necessary, saving money on salt and water wasted on unnecessary regenerations.
- Insures you will not run out of soft water when you least expect it.

State of the Art True Full 1" or 1 1/4" Control System

- Gives maximum flow rates of 27 gpm with no hardness bleed-by for times of peak demand
- Uses Counter Current Regeneration with Downflow Brining technology.

Cation Resin – Softens and Filters Whole House Water

- High Performance 8% Crosslink Resin removes not only hard water minerals like calcium, magnesium & iron, but also dirt and turbidity.
- Available in mixed media beds with Activated Carbon and KDF55.
